

Hotel Corridor Carpet Stain-Hiding Checklist

Vishomecarpet procurement worksheet. Use as an RFQ planning aid, not a final quotation.

Final product construction, price, MOQ, packing, lead time, documents and delivery terms must be confirmed in writing.

Answer First

- Choose medium-to-deep tonal patterning, not simply the darkest carpet.
- Review lighting, corridor width, guest traffic and cleaning access together.
- Reserve spare material or batch records for localized replacement.

RFQ Inputs

- Corridor width and total area.
- Guestroom door spacing and long-run layout.
- Lighting type and color temperature.
- Traffic routes near elevators, breakfast areas and service paths.
- Cleaning method, drying access and target delivery date.

Risk Checks

- Avoid approving from a showroom swatch only.
- Avoid plain solid fields that show footprints and vacuum paths.
- Avoid busy patterns that look like existing dirt from a distance.
- Confirm backing, roll plan, seam plan and replacement stock.
